

February 17, 2020

To Whom It May Concern,

With about 15 years of hands-on experience efficiently driving complex technical programs and over 2 years developing/coding web sites/applications using Adobe Creative Suite, HTML, XML, CSS, JavaScript, jQuery, AJAX, REST and PHP technologies, I am confident I will be an excellent addition to any program and team.

Building state-of-the-art, easy to use, user friendly web sites and applications is truly a passion of mine. I actively seek out new technologies and stay up to date on industry trends and advancements.

Continued education has allowed me to stay ahead of the curve and deliver exceptional work to each project I've worked on design or development. During a current year I've already completed a few project management trainings and earned Project Management Professional (PMP) certification. Thinking further, MBA or PhD could become a great addition to already awarded Master of Science (MS) and PMP.

The key strengths that I possess for success in my job:

- I really love what I do: software development, program management, project management, product management, data analytics, UI/UX design and be a part of the fast-paced Agile environment.
- I strive for a continued excellence and feel myself very comfortable with a permanent self education process.
- I provide exceptional contributions to teamwork projects, as well as to individually completed projects or tasks.

Thank you for your time and consideration! I look forward to talking with you soon.

Sincerely Yours,
Alexander Mars
