To Whom It May Concern,

With over 16 years of hands-on experience efficiently deploying software products/services and over 2 years developing/coding web applications using Adobe Creative Suite, HTML, XML, CSS, JavaScript, jQuery, AJAX, RESTful APIs and PHP technologies, I am confident I will be an excellent addition to any program and team.

Building state-of-the-art, easy to use, user friendly web sites and applications is truly a passion of mine. I actively seek out new technologies and stay up to date on industry trends and advancements.

Continued education has allowed me to stay ahead of the curve and deliver exceptional work to each project I have worked on design or development. During 2019 I have completed a few project management trainings and earned Project Management Professional (PMP) certification. Thinking further, MBA or PhD could become a great addition to already awarded Master of Science (MSs), PMP and PMI-ACP.

The key strengths that I possess for success in my job:

- I really love what I do: software development, product and program management, UI/UX design and be a part of the fast-paced Agile environment.
- I strive for a continued excellence and feel myself very comfortable with a permanent self education process.
- I provide exceptional contributions to teamwork projects, as well as to individually completed projects or tasks.

Thank you for your time and consideration! I look forward to talking with you soon.

Sincerely Yours,
Alexander Mars
